SUMMARY

Front-End Developer with 3+ years of experience. I own the entire frontend of one of Türkiye's leading auto parts e-commerce platforms (1M+ products, 250K+ orders), where I migrated the search, filtering and cart flows to an asynchronous (AJAX) architecture. Outside work, I design, build and ship end-to-end products with Next.js, React, TypeScript, Tailwind CSS and Supabase — including a SaaS I founded, a multilingual clinic app with a full CMS, and corporate websites. Looking to combine my high-traffic e-commerce background with a modern React stack.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React 19, Next.js (App Router), Angular (basic), jQuery, HTML5, CSS3

UI & Styling: Tailwind CSS v4, shadcn/ui, Radix UI, Framer Motion, responsive & mobile-first design, DevExpress

Backend & Data: Supabase (Auth, PostgreSQL, SSR), Prisma, NextAuth, Cloudinary, REST API integrations, Resend, PHP (integration level)

Tools & Practices: Git/GitHub, Vercel, ESLint, Prettier, Lighthouse CI, PostHog, technical SEO & Core Web Vitals

Spoken Languages: Turkish (native) · English (B1 — working proficiency in technical reading & writing, actively improving)

WORK EXPERIENCE

Front-End Developer (Senior Specialist) · Otoparçasan.com — Samsun, Türkiye Sep 2023 – Present

One of Türkiye's leading auto parts e-commerce platforms: 1M+ SKUs, 250K+ orders, 140K+ customers, web + iOS/Android apps.

- Sole responsibility for all frontend development across the platform: product listing, search, filtering, cart and account flows — the entire user journey.
- Rebuilt the product filtering system with a no-page-reload (AJAX) architecture, rewriting the search and filtering experience.
- Redesigned the chassis-number part lookup flow end to end; built asynchronous versions of the vehicle selection screens and the cart flow.
- Designed and built engagement-focused features such as personalized notification settings, a dynamic price-alert button and a campaign banner system.
- Designed, built and shipped the “Partner Services” module from scratch, entirely on my own.

Content Creator · StrategyCube — Ankara, Türkiye

Dec 2022 – Jun 2023

- Produced and edited on-site video content for aesthetic clinics; this industry experience later became the foundation of the health/beauty web products I built (Aura Clinic, RefTakip).

Software Developer · Litum — İzmir, Türkiye

Sep 2022 – Dec 2022

- Built enterprise web interfaces with Angular, TypeScript and DevExpress at an IoT/RTLS technology company; worked on reusable component architecture.

PROJECTS

RefTakip — Customer Referral Tracking SaaS (Founder & Developer) · www.reftakip.com

2026

Next.js 16 · React 19 · TypeScript · Tailwind v4 · shadcn/ui · Supabase (Auth + PostgreSQL) · Resend · PostHog · Vercel

- Built solo, from idea to production: a referral tracking system that answers “which customer brought which new customer” for salons and clinics.
- Unique referral links, 5-stage status tracking, a real-time dashboard, transactional emails and product analytics; authentication and GDPR/KVKK-compliant data storage with Supabase.

Aura Clinic — Multilingual Clinic Web App (real client work, anonymized version) · aura-clinic-six.vercel.app

Next.js 15 · React 19 · TypeScript · Tailwind v4 · shadcn/ui · Prisma + PostgreSQL · NextAuth v5 · Cloudinary · Resend

- A multilingual (TR/EN) web application built for a real aesthetic clinic; I anonymized the brand assets after the client stopped using it.
- Built a full CMS where all content — header, footer, pages, blog and patient stories — is managed from the admin panel; NextAuth authentication, Cloudinary media management, Resend email flows.

Vega PDR — Corporate Website (Freelance) · samsunboyasizgocukduzeltme.com

2026

Next.js · TypeScript · Tailwind CSS · next/image · Technical SEO

- Built the corporate site for a local auto-body business: service pages, before/after gallery, WhatsApp and map integrations.
- Achieved first-page visibility for target local searches with zero ad spend — technical SEO fundamentals only.

Gündüz Wedding — Event Photo Sharing App · gunduz-wedding.vercel.app/anilzeynep

2026

- Guests upload photos/videos in real time; used live at a real ceremony, where I identified a UX issue (no upload feedback) and fixed it with a progress indicator.

EDUCATION

B.Sc. Management Information Systems · Dokuz Eylül University — İzmir, Türkiye

2022
